OPTiFARM

Farm Check - A One off Evaluation by our unique AI

Are you looking to improve your farms performance and ensure your animals are thriving without a long-term commitment? Introducing the Optifarm AI Farm Check.

Our Artificial Intelligence will connect to your farm every 15 minutes for 30 days, monitoring control systems and animal behaviour to identify improvement areas. Compatible with any online control panel and sensor data. At the end of the period, you'll receive a detailed report with our findings and suggestions for improvement.
